

Uti-Cloud

ULTI-CABINET ON-LINE

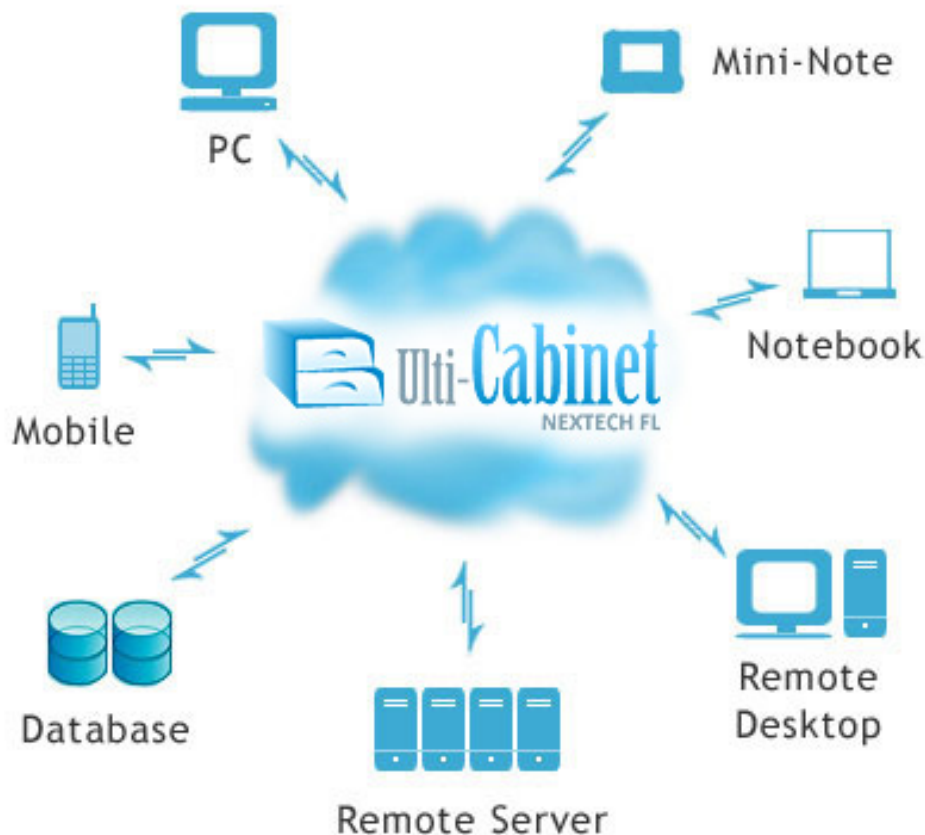

Ulti-Cloud

Ulti-Cabinet on-line is a Software as a Service (SaaS) solution, and follows the “Cloud” computing model which is consistent with the trend that is defining the future of the technology universe. Through Ulti-Cloud, our powerful Ulti-Cabinet software becomes accessible to everyone, whether an individual or an organization, without any significant investment in equipment or IT resources. All you require is access through any device with an internet browser and a monthly subscription fee to increase your information management efficiency.

Ulti-Cabinet

Ulti-Cabinet has become a virtual extension of your office. All records, information and documents required to provide outstanding customer service and increase your productivity, are available through the use of our tool. Because you are empowered with the functionality of virtual printers, mail and fax servers, you will eliminate the need to physically handle any document or information. Your physical records become virtual libraries, drastically reducing the time your employees need to search and handle all your “paperwork”. With the implementation of the latest technology available in the development auto indexing functions in Ulti-Cabinet, you will minimize the need for your personnel to store and index information, thus reducing labor costs and providing better customer service.

Characteristics of Ulti-Cloud

Advantages & Benefits

Rather than installing the software on-site in your system, Ulti-Cloud is available to customers of any level. It is based on a monthly service fee under an annual contract, which covers software subscription and secure data storage.

Whether you are an individual, or a small, medium, to large sized organization with multiple locations, Ulti-Cloud is the best virtual office solution available in the market. With a very low initial set up fee we will guarantee that your customized version of Ulti-Cloud, even if it is a Portal version, will meet all your information requirements and, almost immediately, your employees can start creating more efficient processes and minimizing paperwork. That means that you will never have to install, maintain and upgrade Ulti-Cabinet, while the application grows as your needs grow.

You can benefit from:

- Implementation and training in hours instead of weeks.
- Excellent Cost-efficiency relationship by not requiring capital investment.
- Scalability by providing the resources to grow as the customer requires.
- Risk reduction for being a hosted solution.
- Immediate availability of updates and new features, at no additional cost.
- Easy to use with a Web browser from anywhere in the world and with any device that allows it.
- Information Security under the most stringent world standards, such as:
 - Subscription process with CAPTCHA testing feature
 - Secure http connection
 - Data, connection, transaction and configuration encryption
 - Proprietary Ulti-Cabinet digital signature to protect alterations and filing of documents
 - User digital signature as registered with the governing bodies
 - Version Control mechanism
 - Internal Audit tracking of documents and users
 - Virtual Stamps to block sensitive or private information
 - HIPPA standards and HL7 language for medical records
 - 99.99% data base guarantee with multi-site redundancy.
- Continued use of the application after a catastrophic event.

Equipment

Ulti-Cloud does not require the purchase of special equipment because the application can be used from any device with an Internet browser. However, to use the Ulti-Client Windows module the application requires a PC or laptop running XP or later versions of Windows.

Implementation

1. ANALYSIS & DESIGN

Leave your concerns to us. Nextech FL or one of our distributors can study all of your information management needs, document processes, and analyze every type of document and/or form, to design the customized structure that will be implemented as your final solution of Ulti-Cloud.

2. IMPLEMENTATION & TRAINING

As soon as the structure of the application is approved, including electronic forms, reports, plug-ins, and other elements that are required, Nextech FL configures and installs your customized version of Ulti-Cloud and sets it up on the host server.

3. SUBSCRIPTIONS & ADMINISTRATION

- For organizations with multiple users, the Administrator should proceed to configure their subscription, as follows:
 - Creating Users: Ulti-Cloud allows the system administrator to create as many users as possible within their subscription level.
 - Safety and Permits: The Administrator can also set up the security level for each user and the functions each user can perform within the universe of your Ulti-Cloud functions.
 - Training: Training has never been easier and in a couple of hours your employees can be up and running. A full set of tutorials in the operation of this very “easy to use” product is available for administrators and users on the page “My Account” in your Ulti-Cloud version.

Ulti-Cloud Versions

A. PERSONAL

A revolutionary concept based on a personal subscription to Ulti-Cloud with pre-set templates for personal, professional and small office tasks. We all need to keep our personal documents and information organized and Ulti-Cloud does just that for you. You will be able to subscribe to it through your local telecommunication company and begin a free trial period.

B. ENTERPRISES OF ANY SIZE

Customized Ulti-Cloud to meet your needs and ready to go in as few as 1 business day, with scalable solutions for small to large enterprises. You can choose a number of business templates, add-ons and enhancements to improve your information management efficiency at all levels of your company or organization.

C. PORTALS

This is our newly released Ulti-Cloud version for vertical and horizontal internet portals for private or government entities, to unify and provide access control and procedures for multiple databases and applications. Whether public or private, large multi-agency entities have elected our Ulti-Cloud portal solution to present information from diverse sources in a unified manner. We will custom design your portal to meet your most demanding needs and get it ready to go in a few days.

Ulti-Cloud Templates

We have designed Ulti-Cloud templates and structures for most personal and corporate needs that have been tested and approved for immediate implementation. These solutions enable companies and individuals to use the knowledge acquired by other institutions and people to use a product that has been polished and is ready for deployment. We highlight:

- Human Resources (Personnel, Payroll, Payment Procedures)
- Textile Manufacturing (Production, Cutting, Sewing, Offices, Audit)
- Sales (Dispatches, Driving, Bills of Lading, Invoices)
- Legal (Acts, Constitutions, Assemblies, Cases)
- Accounting (Checks, Payment Orders, Invoices, Reconciliation, Taxes)
- Teachers (records, letters, curriculum, Thesis, Applications)
- Hospital (Service requests, Applications, Procedures, Records)
- Real Estate (Sales, Rentals, Contracts, Property Records)

Support

Support is provided with state-of-art online chat and Voip phone access. Additional personalized service can be provided through our local distributors.
