Re: Ulti-Cabinet Benefits

Max, I wanted to take this opportunity to thank you and your company for the excellent product and support regarding Ulti-Cabinet. We have been able to achieve a great deal of financial savings along with individual's time and efforts with the implementation of this product. There have also been many "soft" benefits we had not talked about or noticed in the past and I'd like to thank you and bring them to your attention for future projects both here and at other locations.

We are using Ulti-Cabinet in place of an expensive document imaging system we had initially looked at. The imaging system required us to print most documents out then scan back in. While various documents still need scanning, all of our MRP documents are automatically loaded and scanned documents can be easily indexed with a bar code. This system has also saved us in paper costs, especially in pre-printed and multi-part forms.

Most of the benefits come from our ability to scan in documents and especially blueprints for easy storage and access by everyone in the company. Our shop is especially pleased by their ability to access blueprints on off shifts when no office support is available.

I look forward to the next step in our implementation process.

Sincerely,

Paul Van Loon  
Purchasing Manager
